

Hey there!

Thanks for joining the recruitment process for Android Developer at Netguru. We've prepared a small task for you! Please develop this app, Compass Project, which could give you the opportunity to show us your coding skills:

Compass Project is a simple compass, which displays a direction for the user to follow. It has a feature to indicate the destination based on a geographic coordinate system. It makes it easy for the user to enter the latitude and longitude coordinates and navigate towards the location.

Good luck! If you have any questions feel free to ping us!
